Preface

Uttaran is one of the largest non government organizations in the south-western region of Bangladesh. A group of youths launched the organization with the initiative of preventing violence and discrimination of women in Tala upazilla under Satkhira district in 1985. At the same time, with their own inspiration, they provided the same importance on achieving the rights of the poor, deprived of rights and marginal people. With the passage of time, the organization working areas have expanded and Uttaran now deals with all the other issues of public life successfully. A varied number of projects, including improving the rights of life and livelihoods of the poor people, protecting human rights, women empowerment, access of the landless on government khaslands and public service, water management and protecting river navigability, providing legal support, adaptation to climate change, disaster management, primary health education, education service, water, sanitation and health, microcredit activities, food security and forming a democratic society etc. Now Uttaran is being implemented its programme in 13 different districts of Bangladesh. With the help of a huge team of Uttaran, the services have been provided to around 2 lakh households in this year. Some of the tasks of Uttaran have made it more popular among the people and the notable tasks are the access to khasland among landless families, achieving rights of the untouchable peoples, women empowerment, educational activities, TRM for resolving water clogging problem and protecting human rights.

For establishing the rights of landless on khasland, the government established land reform ordinance in 1984. Uttaran started working for the access of the landless on khaslands since 1985 when it launched its activities with the poor. Gradually, in 1997 the definition of landless family was revised (the family which does not have any residence or farming land but that is based on agriculture, or, the family has 10% of residence but no farming lands) but the implementation of the government policy was absent there indeed. In such a situation, Uttaran came forwards and made a list of the real landless people, provided support on capacity raising awareness on rights on having the khaslands, ensuring entitlement of the khasland after bargaining by the civil society organization. To establish land rights among the marginalized community Uttaran closely works with the Ministry of Lands and related other government bodies and also has played a significant role to improve the life and livelihoods of them through providing financial supports to make the lands productive and have made the lives of 30% landless people which is really great.

Around 27% untouchable population live in the working areas of Uttaran who are considered lower, untouchable, low caste people to the society. In fact, the society does not allow the cobblers, blacksmith, Munda and others to get mixed with the mainstream of the society and additionally behave with discriminatory attitudes. Though the Constitution of the People's Republic of Bangladesh tells for an equal right for all of the citizens in having access to the public asset and receiving services, they do not have any access at all. Uttaran has started working for such low caste indigenous people since 1985. For improving their life and livelihood, Uttaran is playing an advanced role to provide them agricultural facilities, education, poverty reduction, protecting human rights and access to the government services and upholding their social rights and dignities.

Though women consist 50% of the population, they are the victim of disparity in social, political, religiously. Uttaran believes that sustainable development is not possible unless the condition of women is changed in the country. So, from the beginning of its birth, Uttaran is continuously working for establishing women's rights and remove familial, social, legal and political disparities on women. Around

80% beneficiaries of the organization are women and both the women and children are considered especially important in each of its activities.

Though the coastal regions got benefits for embankments in the regions in the 1960s, it had some negative impacts as well; the river and other water bodies in the south-western regions lost their navigability. As a result, for excessive rains, there were floods, cyclones or tidal surges created water clogging covering a huge area as the waters could not get extracted with the river water. Consequently, the locals are to leave the areas as there are less scopes of agricultural production or other work. Uttaran came forward in such a condition to protect the interest of the affected familiars and started for research on finding the permanent solution of waterlogging problem. The long research proves that Tidal River Management (TRM) is the best acceptable system to bring back navigability of the rivers which is also acknowledged by the government and donor agencies.

Educated nation is the key condition for development and there are no alternatives of education. Uttaran has built up different types of educational institutions for the education of children, teens and youths. Since its inception, education has become a primary area of Uttaran. Through its education activities, Uttaran tries to provide quality education and other educational support to the people of southwest coastal region of Bangladesh, particularly for the poor and marginalized and ethnic minority communities. Uttaran has established following formal education institutes. The institutes are:

- SamakalMaddhyamikBidhaphith (Jatpur village of Tala upazila under Satkhira district)
- Technical Business and Management College (Jatpur village of Tala upazila under Satkhira district)
- Shaheed MuktijoddhaMohabiddaloy (Tala upazila of Satkhira district). This college provides HSC, Degree and Honors level education support.
- Atshoto Bigha Primary School (Debhataupazila of Satkhira district)
- Shishutirtho Primary School (Tala upazila of Satkhira district)

Most of these institutions are run and controlled by government rules. Uttaran provides all types of assistances for raising awareness on specific issues, structural development and improvement of the teachers' standard.

Moreover, MuktiJoddhya Abdus Salam GonoGronthagar was formed by Uttaran in December 29, 2001, when a group of likeminded local citizens came together with Uttaran and decided that the citizens of the Tala area needed a library; a place where youth could come to read books and newspapers. GonoGronthagar is continuously attempting to enhance the quality and accessibility of information people by making free access to computer, internet and other relevant facilities to community people, especially for women and youth from vulnerable and disadvantaged social strata, small and marginal farmers.

According to 2011 survey, 56.5 million people are youths (15 -34) and it will be 67 million in 2020. The government of Bangladesh is working to create a skilled youth for a long time. This is more challenging and cordial participation from people of all level is necessary here. In line with the government aim, Uttaran is working to make the village youths skilled in its working areas and have established 3 residential vocational schools in Parulia of Debhata Upazila under Satkhira district, and Tala Upazila under Satkhira district and Dumuria Upazila of Khulna district. The schools basically provide trainings on 5 different trades and 1225 no of youths have already been trained. The institutions run and controlled by government rules. The Trainees got job in the various organizations and established their own businesses. Besides Uttaran is implementing 3 months mobile technical training in Madaripur, Shariatpur and Faridpur districts.

To improve human right conditions, organize and strengthen the citizen society, it has also been working with other similar organizations and NGOs. Some of the supporters of the activities are different donors like UKAid, UNDP Bangladesh, UNDP/REOPA, European Union, UNICEF, WFP, ILO and international organizations i.e. The Asia Foundation ,Arannyak Foundation , ARD Bangladesh, MCC USA, PRICE, Oxfam GB, ActionAid Bangladesh, Save the Children International, Simavi Netherlands, VSO Bangladesh, MCC Bangladesh, Misereor Germany, Trocaire Ireland, Islamic Relief Worldwide, Solidaridad Network Asia, HKI, PKSF Climate Change Project etc.

Uttaran believes that human rights must be saved. There are no alternatives of this for a sustainable development. Aiming that and with the help of the Government of Japan, Institute for Development Research and Training (IDRT) has been established on 16 bighas of lands in Mubarakpur under Tala upazilla which is an initiative of public-centered development. Here is a resource center which contains different types of books and information. The information center not only serves Uttaran, rather this service is provided to almost all the development organizations living in the same areas, their staffs and all the other people of the south-western belt. With the earnest efforts of Uttaran, it is marching forward for development and dreaming more ...

Uttaran is governed by different policies. These policies are helping Uttaran to implement development interventions properly. Among these policies, one of the very important policies of Uttaran is Personnel Management Policy. The second edited version of Personnel Management Policy was endorsed in 2007. This is the third edition Personnel Management Policy which is endorsed in July, 2017. We believe that this edited version of policy will help to improve the quality of Uttaran's activities.
